## **Continuation Sheet (PTO-303)**

Application No.

Applicant's argument is not persuasive. 1) applicant argues that both Shimizu and Pawlicki did not teach "determining at least one of a position and an anticipated position of a vehicle during a parking operation in relation to an oncoming lane of a multi-lane roadway." Pawlicki teach an object detection system for vehicle to monitor the lane markings 113e along the road surface and monitor the potential presence of oncoming traffic in an adjacent lane or lanes (i.e. multi-lane). 2) applicant argues that since an oncoming lane is not a vehicle or a significant object, it follows that the "Pawlicki" reference cannot disclose the features of the claimed subject matter. Clearly, claimed language is meant oncoming traffic, i.e., vehicle(s), otherwise, if it is just permanent empty lane(s), then there will be no any danger to be monitored and the vehicle can cross oncoming lane anytime.
